

THE FARM TRIBUNE

VOL. XIV — NO. 8

PUBLISHED WEEKLY — PORTERVILLE, CALIFORNIA

Thursday, August 11, 1960

UPPER PHOTO shows major units of Sequoia Rock company, on the Tule river, east of Porterville, including bulk cement storage tank, with a capacity of 1,000 barrels; an automatic ready-mix unit, and the bin and scale unit for rock and sand. In the center is a Euclid truck that handles 40 tons of gravel per load, and a "cement train" unit for bulk hauling. At left center is "the brain" that electronically controls and records ready-mix orders; at bottom left is Noble Nelson, general manager and stockholder in Sequoia Rock company. (Farm Tribune photos)

ENDLESS BELTS run in all directions, at Sequoia Rock company plant, to take various types of gravel from finishing crusher to the proper pile, after rocks and gravel have gone through a primary crusher and a secondary crusher. Upper photo is from the top of the secondary crusher. lower photo shows the finishing crusher. (Farm Tribune photo)

SEQUOIA ROCK COMPANY PUTS PAYROLL AND INVESTMENT INTO COMMUNITY'S ECONOMY

By Bill Rodgers

PORTERVILLE, Aug. 11 — Rocks along a river channel are just rocks to most persons, but to Noble Nelson, general manager and stockholder in the Sequoia Rock company, they represent raw material that can be processed into a wide variety of products for use in the construction trades — and also for manufacturing into grit for turkeys.

Located below Success dam, near the old Worth bridge, Sequoia Rock represents an investment in excess of a million dollars; its gross business is now running more than a million dollars annually, and 32 people are on the payroll.

The plant serves the entire southern San Joaquin valley; its products are going into virtually every major construction job in this valley area, including the Le-moore air base and Success dam, as well as many road jobs and irrigation district projects, both through direct sales, and sales to individuals and firms in various types of construction business.

At the present time, Tule river gravel and rock are "mined" from a 300-acre deposit about a mile below the 13-acre plant site. Raw material is pulled out by drag line, loaded into huge Euclid trucks, 40 tons at a time, and transported to a primary crushing unit, at the plant, that handles boulders up to 18x36 inches in size.

From this unit, with a capacity of 3,000 tons during an eight-hour shift, the rough gravel is transported by endless belt to a "surge pile", from where it is fed as needed, through a tunnel that houses another endless belt, to

the finishing plant, where the river material is crushed to the desired size, washed and segregated.

Included in the finishing plant operation is a series of two crushers, a secondary crusher that further breaks down the rocks, then cone-type finishing crushers that turn out the exact size of material needed.

From this finishing process comes four basic sizes of rock: one and one-half inch, three-quarter inch, one-half inch, and three-eighth inch; also concrete sand.

These products are then further refined for use in such things as road base material, plaster, asphalt paving, cement pipe, and concrete aggregates.

And there are even two sizes of turkey grits — quarter-inch rock for young birds and minus three-eighth inch rock for older birds.

Concerning gravel formations, Nelson states that there are no known rock deposits on the floor of the San Joaquin valley; all formations lie in the foothills. And "good rock" that is acceptable for high test concrete aggregates all comes from the east side of the valley; rock on the west side is unsuited for this high test work, Nelson says.

And known commercial deposits (Continued On Page 10)

County Building Code Before Industrial And Business Council Group In Visalia Tomorrow Morning

VISALIA, Aug. 11 — Recommendation for changes in the county building code will be discussed at a meeting of the Tulare County Industrial and Business Development Council tomorrow morning, 9:30 o'clock, at the chamber of commerce office, county courthouse, in Visalia.

Major points to be considered will be an increase in building inspector fees; a tightening up of restrictions on buildings moved into the county, or moved within the county; and the creation of buffer zones around incorporated cities by the county board of supervisors, based on recommendations as to building code and zoning by the specific city concerned.

A public hearing on changes in the building code ordinance will be held before the board of supervisors at 10 a.m. on August 23.

At the meeting tomorrow, recommendations will be considered (Continued On Page 2)

MOENCH SWINE OFFERED AT STATE SALE

TERRA BELLA, Aug. 11 — W. E. and Delwin Moench, breeders of purebred Hampshire hogs, are listed as consignors to a sale of tested boars, and open and bred gilts to be held at the Fresno District Fair grounds, Saturday, August 20, at 7:30 p.m.

Also consigning from Tulare county is William Silveira, of Tulare.

The sale is being presented through cooperation of the California Swine Testing station and the California Farm Bureau Marketing association.

CALIFORNIA SPEAKS

Significant Statements by Interesting Californians

RUDY VALLEE, L. A., veteran actor-crooner — "My fans still swoon like Pat Boone's do, only it takes them longer to get up."

GEORGE CHANDLER, Susanville, 109-year-old lumberjack, miner and Indian trader — "In the old days if trouble brewed, I'd just turn my back and walk away."

GORDON DAVIS, Atascadero, all-around rodeo champ — "Today's cowboy is a combination athlete and livestock specialist who leaves the rootin' tootin' escapades to the local yokels."

RANSOM M. COOK, S. F. bank exec. — "The price of growth is the need to meet as many new public and private problems as we have faced in the past."

DR. JOHN C. WISTER, famed Swarthmore horticulturist visiting Calif. — "A garden is the perfect antidote to tensions and worldly harassments."

Christmas Ahead!

(Continued from Page 1)
job because of the many tools and power equipment obtained for this purpose since their initial effort last fall.

Over 1,000 toys, many of them large wheel toys, were repaired and made to look like new by the inmates of the Deer Creek camp last year. These toys were distributed and delivered under the direction of the youth of the Fellowship of Churches.

Crowder has expressed his desire to extend this toy repair to the Woodlake camp as the effort has proven to have great rehabilitation qualities for the inmates, and brings so much happiness to the underprivileged children.

Those wishing to contribute repairable toys of any kind, including dolls, may leave them at the Cowan's Furniture Moving & Storage warehouse at 1044 East Date street, Porterville, or at the church where they worship. These toys will be collected from the depots by Road camp personnel.

It is urged that the toys be brought in early so more can be repaired this year.

COUNTY UTILITY ASSESSMENTS UP

SACRAMENTO, Aug. 11—Utility properties in Tulare county have been assessed by the state for 1960 at \$265,990,280, an increase of 7.59 per cent over 1959.

Early Pilgrims did not bring cows with them to America, and lack of milk is said to have had a bearing on the high death rate, particularly of children.

Soviet productivity on farms has increased, but the average Russian must still work 4½ times longer than an American to buy a quart of milk.

CITRUS GROWERS Pedigreed Trees from Certified Stock

Limited number of trees and seedling stock still available. Now booking orders for 1961. Growing grounds located on virgin soil in Pleasant Valley area, Springville.

Information Given On Prevention Of Rabies

VISALIA, August 11 — Over a half million people are bitten by dogs every year in the United States and dogs can transmit over a dozen diseases to man, reports the Tulare County Health department, but the important disease in this area is rabies.

It can be prevented by vaccination. A single shot can protect a dog for two years against rabies and is required in Tulare county to get a dog license. Dog owners now have until August 21st to get

their new license without the penalty for being late.

Man can do several things for himself to avoid getting rabies besides having his pet dog immunized. The biting dog can be quarantined for 14 days and treatment held up. If the dog remains healthy after 14 days, the chances are the dog does not have rabies and treatment for the person will not be necessary.

However, if the dog dies or has symptoms like rabies during those 14 days, Pasteur treatment is necessary. Pasteur treatment is a vaccine shot every day for two weeks.

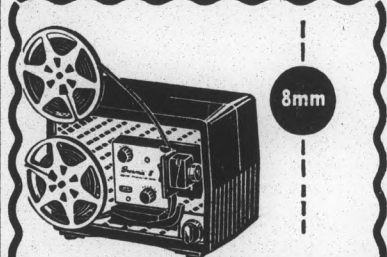

County Industrial

(Continued From Page 1)
from a special committee, named by the president of the industrial and business council, Domer F. Power, concerning changes in the building code ordinance.

Heading this committee is Frank Johns, Jr., of Visalia; others on the committee are: Norman Polly, of Porterville; J. M. Breien, of Exeter; and Harry Butler, of Lindsay.

The matter was brought to a head last week when a committee of Exeter citizens appeared before the board of supervisors to protest the moving of buildings that they considered detrimental, into their area.

The matter of needed changes in the county building code has been discussed by members of the industrial and business development council several times in the past. Following further discussion on March 4, Power set up the special study group that will report back tomorrow morning.

STATE FARM PRICES FIRM DURING MONTH

SACRAMENTO, Aug. 11—Prices received by California farmers as of July 15 were mostly firm to higher than a month earlier with potatoes, grapefruit, and lemons up sharply while prices of grain crops, dry beans, milk cows, hogs, milk, and eggs, were unchanged or up slightly. Moderately lower prices were received for hay, oranges, beef cattle, calves, lambs, wool, and poultry.

Prices received for potatoes and lemons were the highest for the month since 1956. Oranges were

higher than a year ago and above the July average. Grapefruit remained below last year and the average. Prices for hogs and eggs held above a year ago but were lower than average.

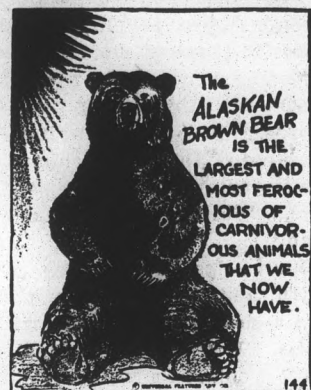

Beef cattle, calves, milk cows, and hay were lower than a year ago but above average. Lamb prices were the lowest since 1955. Below last year and the average were prices of corn, barley, sorghum grain, wool, and chickens.

JOHNNY HAWKINS IN THIRD SPOT

TWAIN HARTE, Aug. 11 — Johnny Hawkins, of Twain Harte, California's top bareback bronc rider, has moved into third spot in official national standings of professional rodeo riders.

Watermelons have been designated as the plentiful-food-to-feature in markets of the nation during the period August 14-20.

Our Town

By GARDNER WHEELER

DISORDERLY STREET NAMES NOW ORDERLY — AND DISORDERLY

OUR TOWN, LIKE SO MANY others, burdigioned and grew in its early days without the benefit of a Planning commission. Presumably, the first settlers picked the handiest tree to settle under, and then as others arrived, cart tracks tied up the various residences. Of course, the cart tracks usually followed the course of least resistance, so they were rarely straight except by accident.

AS THE COMMUNITY PROSPERED, various subdivisions were set up 'round and about. Not as we know them as tract homes, but as land companies that sold ground. This evolution forms a fascinating bit of local history, for so far as we have been able to discover, each subdivider set up his subdivision with a fine disregard for any that might be adjoining.

THE RESULTS ARE ALL that might be expected, and there is not a straight street in town; of more than a few blocks. Wherever a new subdivision was added, the streets invariably jogged. This was a fine display of individual freedom, but is now plaguing those people who have an orderly turn of mind.

NATIVES, OR COME LATELYS, are used to this idiosyncrasy of unmatched streets. It bothers them little that D changes into Sunnyside, or that an erstwhile alley evolves into South Main; that with no effort at all you can travel on one street and sometimes be on B street and then on Second. This is normal.

AND THE NAMING OF THE streets in themselves showed a wide diversity of tastes. In the Southeast corner of town, the alphabet proved quite a favorite item, and the streets start out A, B, etc., but this soon gets lost in a garble of original names. The northeast section went in for numbering, but you can still count the numbered streets on the fingers of one hand. Other sections favored pioneers and came up with Putnam, Hockett, etc. Of course, we couldn't overlook the trees, so a tree lover doubtless named Orange, Olive, Grevilla and the like.

THIS FINE BURST of originality, as to naming and lay-outs, has lately been doomed by the march of progress. Some persons in high places, who like order and abhor originality, took a look at the street and street name situation in and about our town and were distressed by what they saw. Obviously, they could not change the alignment, but they could do the next best thing by re-naming several of our meandering lanes. As a consequence, there is nothing doing at Grevilla and Cypress. It is now Plano and Henderson. Hot rods no longer clatter on Clatte. They roll on Roby, instead. And so on throughout the environs. Now, the safest way to give directions is simply to say, "I'll take you there."

THIS RE-NAMING IS a fine triumph for order, but the old disorder was far more orderly in the minds of the natives. They were used to it, at least.

HIGH SCHOOL SETS \$1.96 RATE

PORTERVILLE, Aug. 11 — A tax rate of \$1.96 — one cent above last year — has been set by the Porterville High School and College board of trustees for the 1960-61 year. Budget for the year is \$2,150,863.

News Of The SPRINGVILLE COMMUNITY

By WINNIE GAGE

Recent guests of Mr. and Mrs. Ray Hamar were her sisters, Miss Clare Kerr of Tulsa, Okla., and Mrs. Elsie Voss of San Diego; her two brothers and wives, Mr. and Mrs. Donald Kerr of El Monte and Mr. and Mrs. Robert Kerr of Lost Hills. They have this family reunion every year at the Hamar's cabin at Camp Nelson.

Visiting Mr. and Mrs. Troy O'Neal and family over the weekend were her mother and husband, Mr. and Mrs. Virgil Mathes of Santa Ana.

Mr. and Mrs. Earl Wilson entertained their daughter and family, Mr. and Mrs. Donald Butterbaugh and children, John and Kathy of

Strathmore, one evening last week with dinner in honor of the Butterbaughs 22nd wedding anniversary.

Mr. and Mrs. W. E. Schenck of Nebraska City, Neb., parents of Mrs. Cyril Miller, repeated their wedding vows before over 100 guests, Saturday night in the Pleasant Valley Chapel.

J. Eldon Anderson was in charge of the ceremony; Mrs. Miller was matron of honor; their eldest son, Merle Schenck, was best man.

Mrs. Schenck's gown was ice blue lace over taffeta; her corsage was white orchid and gold. Mrs. Miller's gown was light blue lace over taffeta and her corsage was of tiny rosebuds.

Their great granddaughter, Pamela Sue Andrews of Albuquerque, New Mexico, and a granddaughter, Pamela Schenck of Redwood City, were the candle

lighters.

Ushers were grandsons, Bill Miller of Ridgecrest and Ronald Miller of Redwood City.

Mrs. J. Eldon Anderson sang a solo, "Silver Threads Among the Gold"; a grandson, Larry Schenck, sang a solo, "At Dawning"; both were accompanied by Mrs. Marion Spees at the organ.

Mr. and Mrs. Schenck were married in Troy, Kansas. They had one son, Merle, and a daughter, Mrs. Cyril (Lavella) Miller, seven grandchildren, nine great grandchildren. Their home is in Nebraska, but they live here in the winter.

Mr. Schenck is a retired railroad man but he is employed at another job.

A reception was held after the ceremony, the tables were beautifully decorated in yellow gladiolas and mums. The gift table was decorated with a pot of gold at the end of the rainbow. They received many gifts, money and cards. They received cards and personal notes from President and Mrs. Dwight Eisenhower. Many pictures were taken.

Mrs. Kenneth Andrews, grand-

CHAPEL CHIMES

By
Rev. N. J.
Thompson

Poliomyelitis is a dangerous disease caused by a virus. Early symptoms include soreness of the neck, headache, fever, or digestive disturbances. Acute inflammation of the anterior horns of the spinal cord can cause partial or total paralysis, due to atrophy of one or more groups of muscles.

Three shots of Salk vaccine can prevent polio paralysis. Nobody else's vaccination can save your life. Nobody else's vaccine for sin can save your soul.

Can a vaccine protect me from virus of sin? Yes, three shots will

daughter, served the two-tiered cake; Mrs. Ronald Miller and Mrs. Bill Miller served punch.

Mrs. Merle Schenck had charge of the guest book, and Miss Linda Cooper and Miss Lynn Woods were in charge of the gifts.

Mr. and Mrs. Jim Garman of Bell have purchased the Walter Bryson property and are moving here to make their home.

Weekend guests of Mr. and Mrs. Cyril Miller were her parents, Mr. and Mrs. W. E. Schenck of Nebraska City, Neb.; her brother, Mr. and Mrs. Merle Schenck and children, Terry, Larry and Pamela, of Redwood City; two sons, Mr. and Mrs. Ronald Miller and daughter Lisa of North Bend, Ore., Mr. and Mrs. Bill Miller and daughters, Gwen and Dawn, of Ridgecrest; a daughter, Mr. and Mrs. Kenneth Andrews and children, Pamela Sue, Mike, Stephanie and Melani, of Albuquerque, New Mexico. The group had dinner at Gang Sue's in Porterville on Sunday and were joined by Mr. and Mrs. N. B. Clinkenbeard, Mrs. Ellen Walrath of Los Angeles (mother of Mrs. Clinkenbeard) and Mr. and Mrs. Harold Rold of Porterville.

Home-made ice cream and cake social will be held Saturday night, August 13th, at 7:30 p.m. on the lawn of the Pleasant Valley Chapel, located on Highway 190. The public is cordially invited.

Potatoes rank first in volume among frozen vegetables, followed by peas.

fight the virus of sin, and prevent the spiritual paralysis that can drag you to a sinner's grave.

What are these shots?

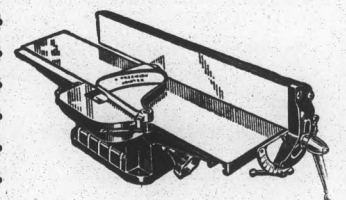

The first is Repentance — being sorry enough about sin to quit sinning. Repentance is a miracle medicine. Some notable patients have used it — Peter, Paul, the Wesley brothers, and Roy Rogers.

Quickly follow with the second shot — Faith. Faith is the spiritual muscle builder. A spiritual paralytic no longer, you'll feel like the cripple healed at the temple gate. Like him, you'll leap for joy and shout, "Glory to God!" Believe your Bible. Believe God's promises of help, health, heaven. Have faith in God.

The third shot must follow the second. Most people stricken by polio had failed to finish their series of shots. Your sick soul needs the third shot — Good Works. St. James writes four chapters in the Bible to emphasize the importance of good works. He says, "Faith without works is dead."

Your dosage of Repentance, Faith, and Good Works will make you a new man. People will exclaim, "Is that the spiritual cripple? Look, he's well and strong, an asset to his community and church."

Take your shots, friend! Remember, nobody else can take YOUR shots.

TEDION TEDION TEDION TEDION TEDION TEDION TEDION TEDION TEDION TEDION

Kill Phosphate Resistant Mites in Cotton and Seed Alfalfa with Tedion Spray

New, long-lasting Tedion controls mites that have become resistant to organic phosphates and other miticides. Yet, it has little or no effect on bees, parasites and predators. If you have a mite problem, stop 'em cold with selective, effective Tedion.

No permit is required because Tedion has a very low toxicity to humans. Treated fields can be re-entered immediately. Irrigation, cultivation and weeding need not be delayed. Because Tedion kills newly hatched mite larvae, nymphs and adults, you get effective control of mites.

Tedion is compatible with most other insecticides so you get dual control with only one operation. Don't let mites rob you of full field profit. Have your fields inspected regularly by your local Niagara Field Representative, who is an experienced entomologist.

For a low-cost, profit-building cotton and seed alfalfa insecticide program, see your local Niagara Field Representative, or call: SU 4-6795

PEACH GROUP SET UP FOR FARMER ASSN.

EXETER, Aug. 11 — A temporary commodity committee of canning peach growers has been set up as an advisory body for the Tulare County Farmers association, a new organization designed to utilize a full labor force in the harvesting of agricultural crops.

On the committee are: Frank Hill, of Strathmore; Don Montgomery, of Exeter; A. J. Atkinson, of Three Rivers; Frank Wilson, of Exeter, and Walter Weekly, of Exeter.

This group is meeting tonight, at 7:30 o'clock, in the Exeter Memorial building to form a permanent Canning Peach Advisory committee. Other commodity groups are being formed within the county farmers' association.

Milking at one time was a religious rite, done only by priests of ancient times, and done only from the stern of the cow!

WHAT DOCTORS SAY ABOUT

Poisonous Plants

• Color-blind Test

Q. Are any plants or flowers commonly found in gardens poisonous?

A. Only a few garden plants are harmful when eaten. Included among the harmful ones are plants of the Solanaceae family, rhododendrons, mountain laurel, Christmas rose, and monkshood. The seeds and juice of oleander are very poisonous; as are many other plants of the Apocynaceae family.

Q. Are there ways to "fool" the color-blind test given to armed service inductees?

A. No. The test usually given for color blindness, in which the person being tested views a series of color plates (such as the Ishihara series), is failed by almost all subjects with any degree of red-green color deficiency. The prescription a physician writes for you is your personal property and it is your right and privilege to have it filled at a pharmacy of your own choosing.

YOUR LEGISLATOR AT WORK!

Senator
J. Howard Williams
32nd District
California State Legislature

Milk is a basic food on the dinner tables of most California families, but getting its fresh wholesomeness there sometimes raises real legislative puzzles. The whole operation from the producer to distributor to consumer must be geared just right in every respect to assure an adequate supply at an economical price which will still keep all elements in the milk business healthy.

California has long had an effective milk marketing stabilization law designed to protect both the housewife and the dairymen. But changing times and our soaring population constantly create new problems which require investigation and perhaps legislative action. Recently the Senate fact finding committee on agriculture and the Assembly interim committee on livestock and dairies held a joint two-day meeting to receive testimony on a number of proposed changes in the milk law.

One measure which had been introduced in our 1959 session but failed to pass the Senate was again reviewed. It would have eliminated all transportation cost deductions now permitted by law on Grade A milk delivered in bulk tanks by dairymen to so-called "country plants". Its effect, if enacted, would be to pass such costs on to the ultimate consumer. Representatives of several farm dairy organizations supported the measure, but others maintained that it would be better to achieve the purpose through administrative action by the bureau of milk stabilization, rather than by another legislative enactment.

Spokesmen for milk distributors opposed the bill on the ground that its passage would result in the closing of many small country plants. Such plants are necessary to the dairy industry, it was declared, to service small producers and assist distributors balance fluctuations in the supply of Grade A milk.

Questions by the Senators and Assemblymen present brought out an estimate that about 15 percent of the milk — about one quart out of every six — produced in the

state is handled through country plants. Their value to continuance of an even supply of Grade A milk has been amply demonstrated, it was said.

Another measure discussed would have established a stabilization and marketing program for "manufacturing milk" — milk of good quality but not quite up to Grade A standards. Such milk is of considerable importance to many food industries. However, pressure for more Grade A milk created by California's new millions, and rising production costs have resulted in a sharp decline in the number of producers of manufacturing milk. Surpluses of Grade A milk diverted to manufacturing purposes have also complicated the problems of such producers.

Such a program, it was pointed out, might stabilize production, insure quality standards, and assure existing producers a market. However, the meeting was cautioned, it apparently could not guarantee price stability because of continuing Grade A surpluses.

These and other bills considered affect the pocketbooks of all California housewives, as well as the economic well-being of the thousands who work in all phases of the dairy industry. Whether the two committees which met jointly will recommend legislative action on the problems to our 1961 session is not yet known, but it is certain that the over-all public interest will be the basis for their decisions on the matters.

FISHIN'

By Slim Washburn

Very little change in fishing conditions on the Tule river watershed from last week. The water is low on all forks, and fishing for native trout is fair. Some good late evening dry fly fishing.

Planted areas around Camp Nelson, Camp Wishon and Clear Slope are heavily stocked each week, and fishing is good. All the tributaries are too low for good fishing.

Reports from the pack stations at Quaking Aspen are that Big Kern is good — very good in the upper stretches. Little Kern is getting low, but is still good fishing, particularly fly fishing. Coyote Lake is good. The fish are in good shape this year.

Evalyn, Blossom and Hidden

Lakes, reached from the Balch Park pack station, are good. Maggie Lake, fair. Summit and Twin Lakes very badly in need of planting, and poor fishing.

Someone has to put a little pressure on some place to get these two lakes planted.

Most streams in the high country are small, and this year are pretty low, with fishing only fair.

Time Out

By DAVIS HARP

HARP AGAIN OUT ON LIMB — THIS TIME IT'S FOOTBALL

This week we are going out on a limb, (this is unusual?) and set up office as a football prognosticator. Our first undertaking as a football prognosticator will be to choose the top 10 college football teams across the length and breadth of the nation.

First of all we should explain the procedure used in choosing the honored teams. We football prognosticators are highly scientific

operators; we don't just pick 10 names out of thin air and say, "yes sir, buddy, these are the 10 best football teams in America." Here is the way we go about our job. First of all we must be very well informed, so we read every newspaper available, then we buy all the leading magazines which are likely to cover the subject. We compare the last season records of the teams and check the lists of re-

turning lettermen of each school, and take into consideration the schedules of the current season. Then no prognostication would be complete without a survey of a cross-section of the local sports fans.

Here is a list of the newspaper and magazines that we used in compiling our prognostication: The Farm Tribune, Arizona Highways, Better Homes and Gardens, Ladies' Home Journal, and Your Baby. We also made a survey of sports fans here in Porterville, and although we will not reveal the names of the people involved because of the volatile subject, we will reveal their occupations and let the reader speculate as to their identity.

The people questioned on the subject were as follows, listed by occupation or current activity: Two gas station attendants, a low flying crop duster, a woman wear-

ing short shorts waiting at a stop light on Main street, a man watching the woman wearing short shorts waiting at a stop light on Main street, a policeman watching the man watching the woman wearing short shorts waiting at a stop light on Main street, an unemployed centerfielder, a crew of Mexican bracero melon pickers, an irate truck driver, and a bartender who had been sampling his wares. If that isn't a representative group we ask what is one?

Here is the result of our process of prognostication:

1. University of Washington — This team has the entire first eleven returning from last year's Rose Bowl championship outfit that lost only one game all season.
2. University of Southern California — 24 returning lettermen from a rock-ribbed team that lost only two games last season.
3. Mississippi — Best in the

State Expenditures Are Up 24 Per Cent

SACRAMENTO, Aug. 11—California expenditures of \$1,506,067,276 for the fiscal 1959-60 year represent a 24.2 per cent increase over the previous fiscal year.

Delicious, refreshing ice cream coupled with your favorite fruit is a good pick-up during hot August days.

powerful south.

4. Syracuse — The best team in the nation last year, has six first stringers returning.

5. Pittsburgh — A rugged outfit that plays the toughest schedule in the nation.

6. Ohio State — Woodie Hayes, Buckeye coach, has the horses this year to rebound, in bone-crushing fashion, from last years 3-5-1 record.

7. Air Force Academy — The newest name in big time football has the nation's best quarterback in sharpshooting Richie Mayo.

8. Arkansas — The Razorbacks have one of the best halfbacks in the land in Lance Alworth, plus a goodly number of returning hogs from last year's Gator Bowl champions.

9. Texas — Top pick in the Southwest conference on the strength of their seasoned juniors.

10. Oklahoma — Not the Oklahoma of three years ago, but still a contender.

*Because we built Medallion,
we gained an extra room*

Mrs. Richard Davis, in her total electric Gold Medallion home

"OUR original plans called for a furnace room," Mrs. Davis, Southern California housewife, relates. "But when we decided to go total electric, we didn't need a furnace room. Instead, I used the same space for a sewing room. And our clean, radiant ceiling heat feels just like sunshine."

Mrs. Davis, a former home economics teacher, also speaks with authority on the advantages of flameless electric cooking. "Along with being cleaner, it's more even. You get the exact heat you select every time."

A mother of four, Mrs. Davis finds that the electric hot water heater easily supplies family demands. And her utility bills, she says, are comparable to the combination utility bills of neighbors with similar size homes and families.

It's easy to see that Mrs. Davis enjoys more of

modern living in her total electric Gold Medallion home. So will you, when you buy or build a home to Medallion Award standards.

Only one new home in five qualifies for the Medallion—an award which assures you:

1. All-electric kitchen equipped with major electric appliances, including flameless range and oven.

2. Housepower wiring to make modern electric living possible.

3. Light for Living—lots of light for comfort, safety and beauty.

The Gold Medallion Award signifies the ultimate in total electric living. It adds:

4. Flameless electric space and water heating.

From

**Daybell
Nursery**

By John

After attending a couple of movies lately and noting the long list of screen credits for photography, lighting, music, etc., we've decided we're missing a chance for fame. With every plant we should include a list of credits of our own. This would take note of the fact that a great deal of unsung effort goes into every plant produced. We could mention this cutting started by Mary Jones under direction of Pete Brown — can furnished by Joe's scavenger service. Pruning by Art Brown, watering by Joe Smith, fertilizing by Elsie the cow, and so forth —

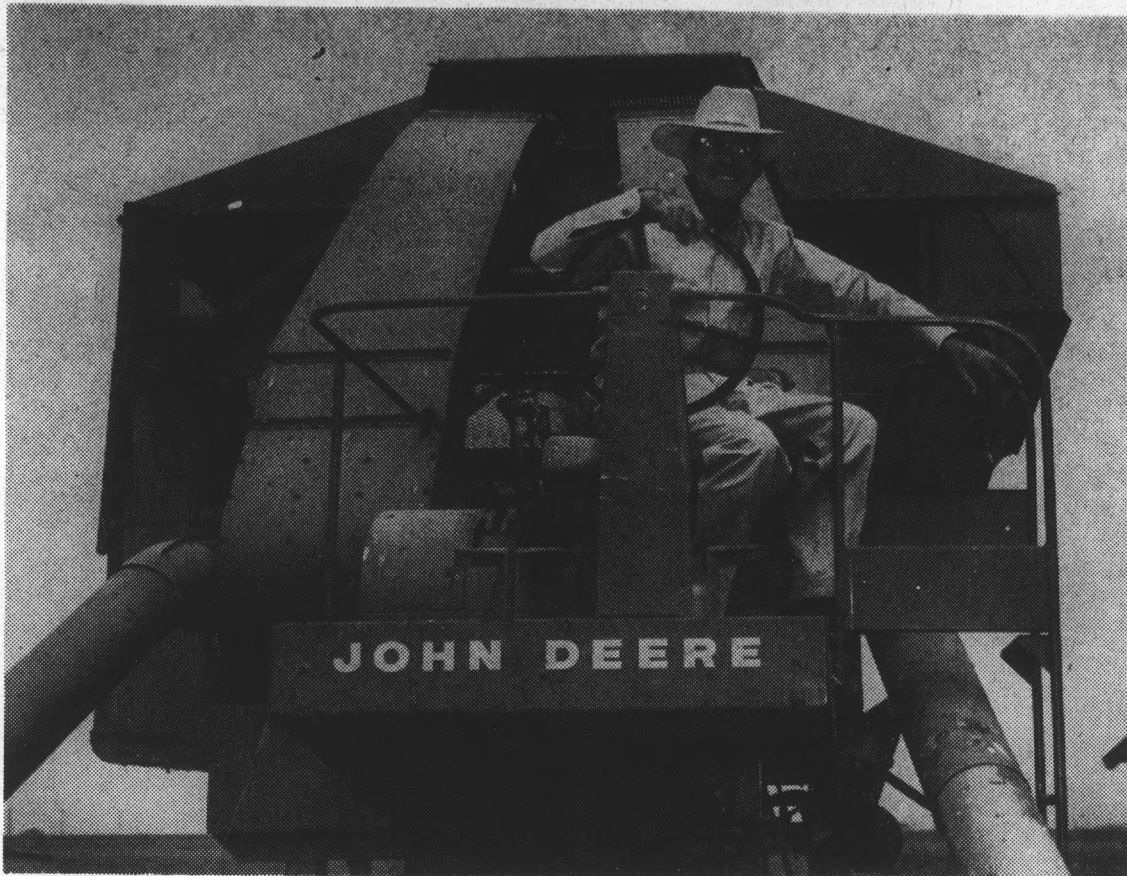

This of course is only a partial list of credits and doesn't include the staking, tying, recanning, delivering, painting can, labeling, spraying, mulching, or assistants thereto — It doesn't even include the name of the guy that will tell you it's died from too much water after you've had it two days.

We might even go further and have a horror room for the children with lawn moths, aphids, and caterpillars enlarged a thousand times. This would keep them in awe of you parents still brave enough to battle the critters.

By the way, if these insects are to survive the winter you had best start planting things. Especially good this month are carrots, beets, swiss chard, leaf lettuce, peas, cabbage, broccoli, cauliflower, onions, and other vegetables. It's also sweet pea, calendula, stock, snap, and pansy seeding time. We have a fresh stock of the world's best seeds over here on "E" Street just north of Olive — Daybell Nursery Production by

TUESDAY BONUS STORE

ANOTHER FARMER WHO FARMS THE "GREEN-WAY"

Meet Roy Langston, Poplar district cotton grower, and a "John Deere" man all the way. In addition to the two row picker above, Roy owns three "Deere" tractors that he uses to farm his more than 500 acres of Alfalfa and cotton.

"KEEP IT CLEAN" Says Roy Langston

"AND YOU'LL KEEP IT PROFITABLE"

THAT'S THE VOICE OF EXPERIENCE SPEAKING, FOR ROY LIKE ALL OTHER FARMERS, HAS LEARNED THAT HIS COTTON PROFITS ARE IN THE PICKING. AND, THE CLEANER THE PICKING — THE GREATER HIS PROFITS.

AND TO ROY THAT MEANS CLEAN ROWS AS WELL AS CLEAN COTTON.

SO, HE DEPENDS ON A "JOHN DEERE" PICKER TO DO THE JOB. AND, WELL HE CAN, FOR NO OTHER MECHANICAL HARVESTER TODAY CAN MATCH THE "DEERE'S" ABILITY TO GET ALL THE COTTON WORTH PICKING, OR TO PICK IT AS CLEAN. IN FACT, SO PRONOUNCED IS THE DIFFERENCE THAT YOU CAN ACTUALLY SPOT A LOAD OF "DEERE" COTTON A HUNDRED FEET AWAY!

THE REASON IS "AIR-TROL", AN EXCLUSIVE "DEERE" DEVELOPMENT THAT HAS BEEN HAILED BY COTTON MEN AS THE GREATEST IMPROVEMENT IN COTTON PICKERS IN THE LAST DECADE.

ANY WONDER THEN WHY MORE AND MORE FARMERS ARE CHANGING TO "DEERE" PICKERS EACH YEAR.

WE THINK YOU WILL TOO, ONCE YOU'VE SEEN THE "DEERE" AT WORK. SO, WHY NOT ARRANGE NOW FOR A DEMONSTRATION DATE. WE'RE BETTING YOU'LL NEVER LET US TAKE IT HOME. NOT IF YOU LIKE CLEAN COTTON. AND, YOU HAVE TO LIKE IT THAT WAY IF — YOU'RE FARMING FOR PROFIT.

AND, FARMERS WHO FARM FOR PROFIT — ARE OUR BEST CUSTOMERS.

We Only Heard

BY BILL RODGERS

ANIMALS IN airplanes was the topic of conversation the other day at the Porterville airport coffee counter. Seems one pilot had a dog that liked to ride in airplanes just like most dogs like to ride in cars. And when the pilot did a slow role, the dog learned to gallop around the interior of the plane like a squirrel in a revolving cage . . . And there was the Labrador retriever that didn't particularly like to have people lay hands on it, but it did like airplane travel. Joke on the dog was to pull the plane up sharply putting a G or two on the dog, who apparently got the same sensation as if someone was pushing him around by hand, to which he would growl and snarl his displeasure . . . Then there was the Siamese cat that liked to fly, that is the cat liked everything except a side slip as the plane landed. When the plane was put into a slip, said cat put on a yowling tantrum, which was sufficient reason to land without slipping. For a Siamese cat throwing a tantrum in the small cabin of an airplane is definitely something to be avoided at all times, particularly while landing . . . Interesting place — the coffee counter at the airport.

UNDER THE heading, "New Pioneers — Which Way," the Christian Science Monitor recently gave the following editorial appraisal of Senator Kennedy and the National Democrat platform for 1960:

Like all political battlers the Democrats tried to conclude the blood-letting at Los Angeles with a love feast of "unity". And as other nominees have done, Senator Kennedy sought to launch his campaign with a rousing battle cry. His acceptance speech was keyed to a call for "new pioneers on a new frontier."

But neither the foundation on which unity can be based nor the direction in which the new frontier faces were made clear. And the acceptance speech, both in structure and substance, disclosed contradictions. It had eloquent and noble passages which contrasted strangely with its glib personal attacks. It disclosed a split in the Democratic Party even deeper and more significant than the North-South division. This schism is one as to goals, one over moral purposes.

Senator Kennedy properly challenged Americans to face new perils and opportunities. With Biblical references he invoked courage and reliance on spiritual help. Most strikingly he declared his new frontier "is not a set of promises — it is a set of challenges . . . It holds out the promise of more sacrifice instead of more security."

He also strongly decried "promises to this group or that" and "assurances of a golden future, where taxes are always low and subsidies ever high," and then amazingly added: "My promises are in the platform you have adopted." Anyone who has read that platform must ask: Has the candidate seen it?

Consider the challenges it makes, the sacrifices it promises:

Taxpayers: They are asked to get along with no increases, to bear up under reductions if arms can be controlled.

Farmers: They are promised the hardship of "parity of income" which will presumably require them reluctantly to accept higher subsidies.

Veterans: Some are asked to bear the burden of receiving increased pensions.

Workers: They would have to endure a higher minimum wage.

Sequoia Rock Co.

(Continued From Page 1)

of usable rock in the northern San Joaquin valley exist only in the channels of the Kern, Tule, Kaweah, Kings and San Joaquin rivers.

"The greatest of all these deposits is located in the area of the Success reservoir," Nelson says, "and, of course, is made unavailable by the Success dam project."

Following the finishing process at the Sequoia Rock company plant, the various types of gravel are carried by endless belt to large, separate piles. Under these piles are tunnels, into which the gravel is dropped and moved by

endless belt to mixing and loading bins, as needed.

Another phase of the Sequoia Rock operation is a most modern ready-mix plant that is completely automatic and electronically controlled by a computer unit, referred to as "the brain."

This electronic computer has the ability to accept 86 separate designs of ready-mix concrete, with the operator merely pressing a button and dialing the number of the mix design that he desires to batch into the ready-mix truck. Each ingredient of the mix is separately weighed — rock, sand, cement, water, and chemical additive mixture — and the entire operation, including date and time, is recorded on a permanent paper record to provide an absolute accounting for the purchaser.

"We guarantee accuracy by weight to one-half of one per cent in this operation," Nelson says. "Actually, it is even more accurate than that."

Nelson also points out that this equipment eliminates the need for an inspector, and that in delivering read-mix to such projects as Success dam, the equipment is locked during a given run so that at the end of the day the engineers in charge of the project have

a written record of every batch delivered.

In addition to the actual plant machinery, the Sequoia Rock operation requires considerable heavy, mobile equipment: Three, 40-ton Euclid trucks, two large four-wheel drive skip loaders, a two-and-one-half yard drag line, 12 ready-mix trucks, a portable mix plant, a truck and trailer "cement train" unit to haul bulk cement from Davenport, near Santa Cruz, plus a number of smaller items, such as bulldozers, graders and standard trucks.

Although there are plants much closer to the Lemoore air base project than Sequoia rock, quality of sand produced from the Tule river is such that contractors on this job are using a considerable volume of Sequoia Rock products.

As for Success dam, Sequoia Rock company has produced all the concrete used in this project, plus many special grades and sizes of rock produced for wells, roads, and other specialized work. The Success project represents about 10 per cent of Sequoia rock business.

A second unit of Sequoia Rock operation is a ready-mix plant in Visalia, where 14 persons are employed.

Nelson looks toward the future with optimism.

"We have increased our volume of business four times in the two and one-half years that we have been in operation," he says. "With continued growth in the San Joaquin valley, we believe that within the next five years we can double our present dollar volume."

Based on the present operation, Sequoia now has enough raw material in the river channel to last 15 years. New deposits are being prospected further up the river channel, although Nelson says that rocks increase in size toward the mountains, and that in order to handle the formations found below Springville, installation of heavier, expensive equipment would be necessary.

As for the stories about gold in the gravel deposits, Nelson says that the possibility of gold recovery as a by-product of the operation has been carefully checked, but that because of the limited amount of gold, and because of its fine formation, installation of recovery equipment does not seem economically feasible.

However, Bryan Jones, who resides above Springville and who owns property that Sequoia Rock is leasing for gravel, has put a sluice box at the bottom of the finishing plant and is recovering some gold.

An associated operation is expected to be in business by the middle of August adjacent to Sequoia Rock — an asphalt plant that is being installed by Ronnie Wells. This plant will receive

more power for unions.

Business: It would be handicapped by various kinds of paternalistic interference — including tariffs.

States and Cities: They would be asked to take federal money for slum clearance and school building.

Consumers: They would be required to manage somehow with lower prices.

The promises to "this or that group" in the new Democratic platform "cover the water front." On the list are some real needs, some places where federal aid — properly limited — is justified. But just where are the challenges, the sacrifices?

Which way does this frontier face? Does it call Americans to the grim competition with the totalitarians in which every segment of American society must gird for action and effort, dropping every soft self-indulgence, every form of prop or feather bed? Or does this frontier face toward grab-bag government, inviting every group or special interest to scramble for federal favors, to be apportioned according to political pressures rather than justice or national welfare?

High-minded theorists among the Democrats may have their vision of a new frontier. But how do they expect to reach it by challenging Americans to compete not in sacrifice but in pleas for federal aid?

material by endless belt directly from the Sequoia Rock company plant.

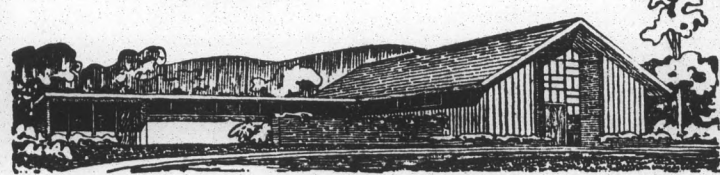

Stockholders in Sequoia Rock company, with Nelson, are Tom Latham and B. Willis Weekes, both of Bakersfield.

WORK UNDERWAY ON SAUCELITO WATER SYSTEM

SAUCELITO, Aug. 11 — Construction work is underway on a water distribution system in the Saucelito Irrigation district, following ground-breaking ceremonies at the district office last Thursday morning.

Presiding at the ground-breaking was Everett Cloer, chairman of the district board; introduced were directors: Robert O. McCloskey, H. C. Henderson, Steve Ferrero, and John S. Taggard.

Participating also was Congressman Harlan Hagen.

The \$3,000,000 plus project will provide a distribution system for the 20,000 acre district, which was formed back in 1941.

THE ANSWER TO YOUR WATER PROBLEMS — DEPTHS AS DEEP AS 100 FT. WITH CAPACITIES TO 30 G.P.M.

ECONOMY OF OPERATION

Greater capacity and pressure with minimum power consumption.

LOWER INITIAL COST

Because of high efficiency you can buy a lower horsepower pump to meet your capacity and pressure requirements.

PROTECTION FROM FREEZING

All operating parts — pump and motor — are set deep in your well, completely safeguard against extreme cold.

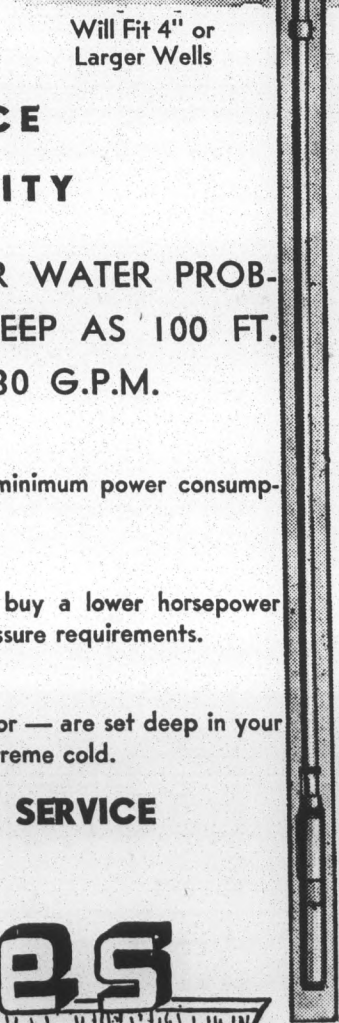

WE INSTALL — WE SERVICE
